Bachelor of Science

Graduated August 2016
Computer Science

EMPLOYMENT

Software Engineer III

1/2020–present

Software Engineer II

5/2018–1/2020

Walmart Labs

Rogers, AR

- Full-stack developer using Java, JavaScript, and React
- Lead front-end development, including planning and architecture on entire stack
- Create and support applications to greatly improve associate performance in distribution centers
- Automate tedious processes to reduce errors and increase time spent developing
- Design wireframes to match Walmart UI/UX standards using Sketch
- Migrated services to cloud with new, user-friendly UI with no issues
- Developed plugin to interface with older hardware that saved ~\$20,000

Software Developer I

8/2016–5/2018

USAbLe Life

Little Rock, AR

- Full-stack developer using .NET MVC, C#, JavaScript, and SQL Server
- Developed an app to automate part of the insurance underwriting process
- Developed app that streamlines adding insured groups to our Oracle back-end with 4 other developers
- Prototyped and used Vue.js to streamline development of reactive pages
- Developed POCs for dynamic forms with validation and drag-and-drop using React

Helpdesk Technician

8/2013–8/2016

CARTI

Little Rock, AR

- Developed PowerShell module to automate the new hire process
- Developed Mirth Connect transformer script to convert HL7 message attachments to PDF
- Partnered with department leaders to coordinate the move of CARTI's largest Radiation Oncology Clinic

Ongoing Application Support Intern
